Paola Bianca Palomo

Due to time constraints, you only have time to complete automation testing of 10 scenario's for this new website. https://jupiter.cloud.planittesting.com/#/

Determine 10 test cases which reflects the priorities of this website

TEST CASE SCENARIOS:

1. Check results on entering a valid username and password.
2. Check results on entering invalid username and password.
3. Check the response when a User ID is empty & login button is pressed.
4. Check if the buy button adds the correct item to the cart.
5. Check if the website computes the correct amount for purchases.
6. Check if the total amount displayed is a valid value (number of decimal places, currency).
7. Check if the payment verification is working and only accepts valid card details.
8. Check if the buttons are performing their desired function.
9. Check if the form accepts empty inputs on required fields for checkout.
10. Check if the orders are saved in the database upon successful ordering.
